What We Learned: The In-Store Playbook

In-Store behaviors our digital recommendations are designed to replicate:

Guided Discovery First

Meeting customers where they are before showing anything.

Targeted Questions

"How do you intend to use the bike?"

Education Sells

Explaining what accessories do and why they matter is the key to attachment.

Safety as a Given

Essentials are framed as non-optional, not upsells.

Show the Full Vision

"Plant seeds" by showing how the bike looks with add-ons.

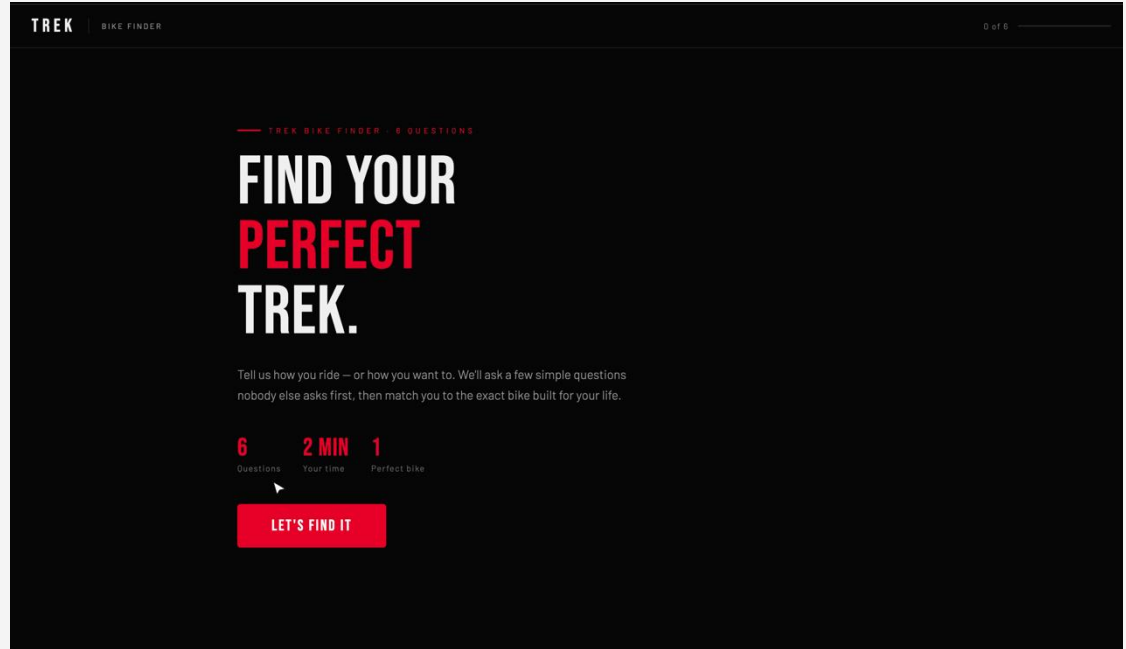

The Return Pattern

If customers don't buy add-ons at pickup, they almost always come back within a month.

Bike Essentials Bundle

“Other bike *essentials*”

Key Design Principles:

- Placed on the **product page**
- Curated to the specific bike (not generic accessories)
- Top **in-store** add-ons: kickstand, bottle cage, helmet, pedals
- Framed as “what your bike **needs**,” not “you might also like...”

In-store add-on rate: 76% vs. Online: 20%

Essentials Bundle Example — Product Page

Complete Your Marlin 6 →

☐	Kickstand Components	\$28
☐	Water Bottle Cage Bottles & Cages	\$16
☐	Presta Valve Tube Rubber	\$12
☐	Solstice Helmet Helmets	\$55
☐	Flat Pedal Set Components	\$34

Add Selected to Cart

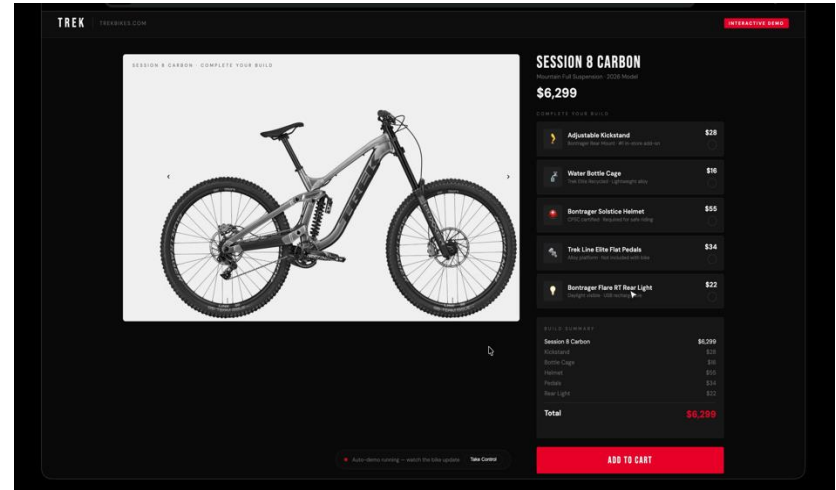

"Complete the Vision" - Visual Add-On Preview

See Your Bike Before You Buy

How it works:

- Customer selects add-ons from the Essentials Bundle
- Product page dynamically renders a composite image of the bike + selected accessories
- Acts as a visual confirmation - reduces buyer hesitation
- "See the vision" framing mimics the associate's in-store narrative

"Complete the Vision" - Mockup

✓ Kickstand ✓ Bottle Cage ✓ Helmet ✓ Pedals

Bundle Total: \$145

Implementation Roadmap

Estimated Financial Impact

If Trek closes even a fraction of the add-on gap online:

Add-On Rate: 20% → 30%

+10% on 131K online purchases

~\$17M

in incremental add-on revenue

Cart Abandonment: 63% → 55%

+~10K purchases per year at \$378 Average Order Value

~\$3.8M

in incremental web revenue

Email Engagement Rate

5% of 131K buyers engage with Day 21 email

+6,550

add-on transactions / year

Assumptions: 2025 baseline of 131,686 purchases, \$12 avg add-on (online), \$146 avg add-on (in-store).

11

Measuring Effectiveness

Tracking success across each recommendation

Add-on Attach Rate

+8–12%

add-on attach rate lift
by Day 90

HOW TO MEASURE

- Day 30: measure baseline attach rate
- Day 90: target +8–12 percentage points vs. baseline
- Day 180: assess sustained lift

Quiz Engagement

≥ 40%

quiz completion
rate target

HOW TO MEASURE

- Track completion rate (target ≥ 40%)
- Measure CTR from quiz to add-on pages (≥ 25%)
- Monitor add-on conversion from quiz sessions (≥ 8%)

Email ROI

≥ \$12

add-on revenue
per email sent

HOW TO MEASURE

- Open rate ≥ 35% across the 3-email sequence
- Click-through rate ≥ 6%
- Revenue per send ≥ \$12 in add-ons attributed

Bundle Revenue Lift

≥ \$45

AOV increase vs.
bike-only purchase

HOW TO MEASURE

- Bundle take rate ≥ 15% of bike product pages
- AOV lift ≥ \$45 vs. non-bundle orders
- Review attach rate iteration every 30 days

Next Steps for Trek

Problem Statement

Learning Points

Recommendations

Implementation & Impact

Next Steps

Impact Justification

Baseline assumptions: 131,686 purchases (2025) • \$12 avg online add-on • \$146 avg in-store add-on • \$378 AOV

① Add-On Rate: 20% → 30%

131K in-store buyers × +10pp lift × \$146 avg ≈ \$19M + 131K online × +10pp × \$12 ≈ \$1.6M → blended ~\$17M

~\$17M

incremental add-on revenue

② Cart Abandonment: 63% → 55%

Recover 8pp abandonment → ~10,000 additional purchases × \$378 AOV = \$3.78M ≈ ~\$3.8M

~\$3.8M

incremental bike revenue

③ Email Engagement Rate (Day 21)

131,686 buyers × 5% benchmark engagement rate = 6,583 ≈ +6,550 add-on transactions/year

+6,550

add-on transactions / year

③ is a volume metric that feeds into ①; it is not counted as separate revenue. All figures are estimates based on 2025 baseline data.
